

UV printable materials
for the decoration, manifestation and
enhancement of the glazed environment

LINTEC's UV range enables designers, architects and graphics professionals to transform the glazed environment into vibrant and exciting advertising, design and corporate identity opportunities. The wide printing compatibility, ease of handling and near perfect optical clarity makes it the first choice for premier brands and creative glazing applications.

The films are constructed using the finest optical quality components ensuring optimum light transmission, low haze and minimal distortion. All manufacturing is carried out in clean-room conditions using precision equipment to ensure superior defect-free consistency.

Highly suitable for the decoration, manifestation and enhancement of the glazed environment and by selectively printing areas introduces both decoration and privacy. Once printed they can be easily fitted on site via wet application methods.

A range of films is available to comply with all performance requirements; from short term point-of-sale to long term architectural applications.

- UV printable 
- optional
- Optically clear 
- Scratch resistant 
- UV filtering 
- Permanent adhesive 
- Removable adhesive 
- Dry-apply adhesive 
- Fire rated 

Optically clear UV printable glazing enhancement film

Lintec Europe's unique topcoatings are specifically designed for printing with UV based inks and have been tested and approved by leading printer manufacturers.

A variety of films are available to suit all flat glass applications. These include printable scratch-resistant surfaces that ensure excellent ink-adhesion combined with superior scratch resistance of non-printed areas; long term architectural; 99% UV blocking films; and removable POS films.
